SUMMARY

Full Stack Software Engineer with a Bachelor of Computer Science (S.Kom) and nearly two years of freelance experience building end-to-end web applications: React and Next.js frontends, Laravel and Node.js backends, and MySQL/PostgreSQL databases. Delivered 15+ projects (LMS, e-commerce, ERP) for SME and academic clients with a 70–80% client retention rate, and designed AI features using the Gemini API and a RAG pipeline. Earlier roles in data administration and system support give a solid grounding in databases, reporting, and reliable day-to-day operations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Java, Python, Golang, SQL

Frontend: React.js, Next.js, TailwindCSS, Shadcn/UI, Redux, Zustand, TanStack Query

Backend: Laravel, Node.js, NestJS, Spring Boot, Flask, REST APIs, RBAC (Spatie Laravel Permission)

Databases: MySQL, PostgreSQL, MongoDB, Redis, Firebase, Prisma ORM, Hibernate

AI: Gemini API, RAG pipelines, few-shot prompting, fine-tuning; Claude Code, Codex, GitHub Copilot

DevOps & Tools: Docker, CI/CD (GitHub Actions), Git, GitHub, Postman, Vercel, GCP, AWS, Azure, Linux/VPS, Sentry

Other: Microsoft Office, MySQL database management, data analysis, SEO, graphic design

PROFESSIONAL EXPERIENCE

Freelance Web Developer & AI Consultant | Freelance, Surabaya

Sep 2023 – Jul 2025

- Built and delivered 15+ full stack projects (LMS, e-commerce, ERP) for SME and academic clients, with a 70–80% client retention rate.
- Designed a multi-modal AI mental health support system for a research client using the Gemini API, a RAG pipeline (cosine similarity), few-shot prompting, and domain-specific fine-tuning.
- Implemented role-based access control (RBAC) in multi-tenant applications with Spatie Laravel Permission, supporting 3+ user tiers.
- Optimized server performance (InnoDB and PHP-FPM tuning) to resolve timeouts on reporting modules.

Web Application Developer | Menturus Village Office, Kudu District, Jombang Regency

Independent project

- Developed a web-based application for the village office; also worked as a freelance graphic designer and Google AdSense publisher.

SRS Operator (Registration Administration) | PT Kebun Tebu Mas, Finance Division

Apr – Oct 2018

- Maintained the sugarcane haulage database using Microsoft Office and MySQL, covering the crystal sugar and molasses production sectors.
- Verified driver registration, checked weighing receipts, and prepared reports matching receipts against cutting-and-transport tickets.

Intern | PT Pos Indonesia (Persero), Jombang Post Office

Aug – Sep 2015

- Built a supplementary web-based application as a backup for the Pos program; helped resolve network errors affecting the MySQL database and assisted with network upgrades.
- Scanned and tracked parcels with barcodes to confirm shipping status.

Intern | KPRI Muncul, Sukorame Branch, Ngimbang District

Aug – Sep 2014

- Recorded sales and purchase transactions in the General Journal, Balance Sheet, and General Ledger, and entered the data into the database.
- Repaired software faults on cooperative computer systems.

EDUCATION

Bachelor of Computer Science (S.Kom) | KH. Abdul Wahab Hasbullah University, Tambak Beras, Jombang

2013 – 2017

SMAN 1 Ngimbang (2010 – 2013) | SMPN 1 Ngimbang (2007 – 2010) | SDN Munungrejo II (2001 – 2007)

ORGANIZATIONS

Member of Karang Taruna (youth organization) and Remas (Mosque Youth)
